HOW WE FULLFILL

SCREEN PRINT

The most common form of garment printing. We use a mesh screen to push ink onto your garment, one color at a time, creating bold, long-lasting, vibrant prints.

DTF

This digital process is where designs are printed onto a special film, covered with an adhesive powder, and then heat-pressed onto fabric.

EMBROIDERY

Recommended for jackets, caps, polos and other company casual attire. This is the process of stitching a design directly onto fabric using thread. It gives a textured, professional, and long-lasting look.

PROMOTIONAL

Custom promotional products and marketing swag to elevate your brand. From pens, tote bags, tumblers, gifts these products are sure to help gain brand impressions.

*Minimum order quantity varies. Consult with one of our team members.

DIRECT SHIPPING

Orders are fulfilled within 2-3 weeks after online store deadline. Once orders leave our facility, customer receives a confirmation email and tracking number.
